

HCM offers the latest innovations in vial filling, including the Inova VFVM 3031 filler, which features Class 100 area capping, and the BOC Edwards LyoMax3 lyophilization unit. Our three state-of-the-art fill suites can accommodate clients in pre-clinical through commercial-scale production, and are capable of producing up to 75,000 vials per day.

Vial filling line:

- Inova VFVM-3031
 - 1mL to 100mL
 - Up to 75,000 units per day
 - Inline pre-gas purge
 - Inline liquid fill
 - Inline post-headspace
 - Suction stopper placement
 - Class 100 capping
 - Low hold-up volume filling
