

HCM's three state-of-the-art fill suites provide the latest innovations in syringe and vial filling, including the BOC Edwards LyoMax3 batch lyophilizer. Among its many attributes, the LyoMax3 offers thirty-six square feet of shelf area, allowing for the lyophilization of up to 19,000 vials per batch and three removable trays for the lyophilization of vials up to 250mL. The LyoMax3 features cGMP construction and is fully 211 part 11 compliant.

Lyophilization:

BOC Edwards Lyomax3

Six product shelves

36 square feet of shelf area

Two shelf interdistant settings (69mm or 140mm)

Lead/Lag circulating pumps (for shelves and condenser)

Redundant systems (compressors, vacuum pumps)

Hyaluron Contract Manufacturing
